PROFESSIONAL SUMMARY

Computer Science graduate (Aug 2026) and Certified Artificial Intelligence Professional (CAIP) with end-to-end project delivery experience spanning enterprise ERP automation at Optum (UnitedHealth Group), a production mobile app published on Google Play Store, and a university-deployed Student Information System serving 100+ users. Certified Lean Six Sigma Yellow Belt with hands-on Agile, Scrum, and hybrid methodology experience. Best CS Thesis Awardee recognized for both technical excellence and social impact. Proven ability to lead cross-functional teams, align executive stakeholders, manage scope under hard deadlines, and translate technical complexity into business outcomes.

CORE COMPETENCIES AND TECHNICAL SKILLS

- Project Management: Agile, Scrum, Kanban, Waterfall, Hybrid Agile-Waterfall, SDLC, Roadmap Development, Scope Management, Risk Mitigation, Sprint Planning, Stakeholder Alignment, Status Reporting
- Process Improvement: Lean Six Sigma CLSSYB, Workflow Optimization, KPI Tracking, Continuous Improvement, Data-Driven Decision Making
- PM Tools: Jira, Monday.com, MS Project, MS Teams, SharePoint, Power Automate, Google Workspace, Figma
- Development: Python, JavaScript, TypeScript, React Native, SQL, Firebase, Supabase, UI/UX Design
- AI and Data: Artificial Intelligence, Computer Vision, K-Means Clustering, TensorFlow, Daltonization Algorithms, Image Processing
- Soft Skills: Executive Communication, Cross-Functional Leadership, Strategic Planning, Public Relations, Team Empowerment

PROFESSIONAL EXPERIENCE

ERP Project Coordinator Intern, Executive Administration Division

Optum (UnitedHealth Group) | Makati, Philippines | July 2025 - August 2025

- Contributed to a 35% improvement in process efficiency across internal departmental workflows by partnering with Executive Administration leadership to design and deploy enterprise-level automation initiatives.
- Reduced manual data entry time by 30% and achieved 100% data accuracy by co-developing a SharePoint-based ERP Merchandise System with modular separation across data parsing, business logic, and reporting layers.
- Facilitated requirement-gathering sessions with cross-functional stakeholders including developers, operations teams, and executive leadership to align on deliverables and ensure seamless deployment without production disruption.
- Maintained version-controlled documentation and generated executive-ready project status reports, keeping all stakeholders informed and aligned on project health, blockers, and next steps.

Public Relations Officer

LPU-Cavite Central Student Government (LYCESGO) | Philippines | January 2026 - May 2026

- Managed communications and stakeholder engagement across multiple university departments for a community of 5,000+ students, ensuring consistent institutional messaging.
- Coordinated cross-functional campaigns between university administration, faculty advisors, and student representatives to deliver timely public-facing communications.

KEY PROJECTS AND DELIVERABLES

ReColor - Mobile Vision Assistive App for Color Vision Deficiency

Best CS Thesis Awardee | Best Research in Social Science and Humanities | Published on Google Play Store | Aug 2025 - May 2026

- Led end-to-end delivery of a production-grade mobile application built with React Native and modular architecture across four image processing services, from scoping and clinical validation to Google Play Store publication.

- Achieved measurable clinical outcomes: +6.91 delta-E color discrimination gain, 100% ground-truth color accuracy, and clinical expert acceptance rating of 3.92/4.00, validated by 30 end users, 10 IT experts, and 3 clinical specialists from the Philippine Eye Research Institute (PERI).
- Managed scope, cross-functional dependencies, and timeline across developer, clinical, and end-user workstreams, maintaining delivery cadence under academic deadline constraints.
- Applied Daltonization algorithms, K-Means Clustering, and lab color space transformations, bridging AI research and real-world accessibility impact for an estimated 8% of the global male population.

QuadLearning Student Information System - Lead Project Manager

4-Developer Team | 100+ Active Users | Aug 2024 - May 2025

- Directed a cross-functional team of 4 developers using hybrid Agile-Waterfall methodology to design, build, and deploy a university SIS adopted by 100+ students and staff, reducing academic record processing time by 35%.
- Translated requirements from 20+ stakeholders into an actionable product roadmap; managed scope and prioritized features to meet a fixed university accreditation deadline with zero slippage.
- Conducted iterative sprint planning and reviews; iterated UI/UX in Figma based on post-launch performance monitoring and user feedback, demonstrating a continuous improvement mindset.
- Maintained project health metrics, tracked risks proactively, and kept all stakeholders aligned through weekly status updates and full decision documentation.

ERP Merchandise System Automation - Optum Global Solutions

Enterprise Process Optimization | July 2025 - August 2025

- Co-architected SharePoint ERP system with modular layers across data parsing, business logic, and reporting; reduced manual data entry by 30% and achieved 100% inventory data accuracy.
- Coordinated multi-department deployment with Executive Administration, developers, and operations teams, contributing to a 35% improvement in overall departmental process efficiency.

LEADERSHIP EXPERIENCE

President

LPU-Cavite Student Association for Technological Advancement (SATA) | June 2024 - June 2025

- Led a 13-member executive board and organized 10+ tech-driven events per semester, increasing student participation by 40% through targeted outreach and strategic programming.
- Translated organizational mission into actionable event roadmaps; managed scope, timelines, budgets, and resources across multiple concurrent initiatives.
- Streamlined event logistics and team workflows using MS Teams, reducing planning time by 25% and improving cross-committee coordination and delivery reliability.
- Negotiated partnerships with universities and the National Youth Coalition Organization, expanding external network and creating industry exposure opportunities for members.

EDUCATION

Bachelor of Science in Computer Science

Lyceum of the Philippines University - Cavite | Expected August 2026

- Best CS Thesis Awardee and Best Research in Social Science and Humanities
- Academic Honorable Mention
- Relevant Coursework: Software Engineering, Artificial Intelligence, Database Management Systems, Systems Analysis and Design, Human-Computer Interaction, Data Structures and Algorithms

CERTIFICATIONS

- Certified Artificial Intelligence Professional (CAIP) - 2026
- Certified Lean Six Sigma Yellow Belt (CLSSYB) - Management and Strategy Institute - 2024
- AWS Business Essentials - 2024
- Project Management Foundations: Integration - 2023
- Engaging Stakeholders for Success - Cisco - 2025

- SAP Business One Student Courseware
